DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: the invention includes 28 drawings with 8 different embodiments.

- a) Figures 1 and 3 are drawn to an audio control signal transmission and reception apparatus, respectively.
- b) Figure 5 is drawn to another configuration of an audio control signal transmission apparatus.
- c) Figures 6 and 7 are drawn to television transmission and reception apparatus, respectively.
- d) Figure 12 is drawn to a control system for controlling operation of a video/audio signal recording and reproducing apparatus via a television reception apparatus.
- e) Figures 14 and 15 are drawn to another configuration of a television transmission and reception apparatus, respectively.
- f) Figure 17 is drawn to a program information transmission apparatus.
- g) Figure 20 is drawn to an audio signal reception/recording/reproduction apparatus.
- h) Figure 22 is drawn to a television transmission apparatus.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
